
Proposed Entry Points and Amenities

Hudson Highlands Fjord Trail

The Hudson Highlands Fjord Trail offers a **community-driven solution** for managing regional tourism and will make the beauty that surrounds us more accessible to people of all ages and abilities.

How will the Fjord Trail serve as a solution for managing visitation to the area?

The 7.5-mile main trail between Beacon and Cold Spring is envisioned with **six main access points to help distribute visitors** along the trail's entire span.

Sidewalks from train to trail and wayfinding signage will help **keep pedestrians off neighborhood streets and dangerous Route 9D.**

Four new parking lots will **make nearly 500 parking spots available north of the Village**, decrease side-street parking, and lessen the impacts of vehicles searching for parking.

The trail's **shuttle van system** will allow users to park in one area and visit another, or visit different sections of the trail without using their vehicles.

The Visitor Center at Dutchess Manor will **strategically draw hikers away from Cold Spring** by serving as the trail's orienting hub and welcoming visitors with parking, amenities, and educational programs.

The Fjord Trail will provide **new restrooms and trash collection**, built and maintained by HHFT, Inc.

Explore **hhft.org** to learn more about the trail and upcoming opportunities to help shape the project.
