

Hudson Highlands Fjord Trail

The Fjord Trail will get hikers out of Village neighborhoods, off the highway and onto the main trail (which is only planned to be like a boardwalk for specific short sections along the river's edge) quickly, conveniently and safely. Hikers will use it, rather than the road, to get from where they park or arrive at a train station to their desired trailhead. Non-hikers, who want to take a walk or bike ride along a section of the trail, will distribute use along the route and help relieve overcrowding along currently popular trails.
