

The intersection between NYS Route 9D and County Route 301 has been looked at by both the NYS DOT and Cold Spring Village leadership with an eye toward making it function more efficiently. There are some simple alterations that could improve traffic flow and pedestrian and cyclist safety. HHFT is happy to provide input, but the intersection is out of our jurisdiction. For our part, HHFT will be actively encouraging visitors to the trail to arrive by train whenever possible. For users who live within walking or cycling distance to a Fjord Trail shuttle stop, we will encourage using the shuttle system, rather than a car to access trailheads, further reducing congestion on Route 9D.
