

Hudson Highlands Fjord Trail

The challenges of over tourism already exist and they are not going away, with or without a managed response. In the last twenty years, the Hudson Highlands Fjord Trail has been the only solution proffered to help improve safe access to public park land and manage visitor congestion through strategic visitor management practices and enhanced infrastructure. The issues local communities face will not fix themselves. Although Dockside is currently one of the six planned entry points, that determination has not yet been made.
